Bricker On Friday, June 24th, 1910, to Mr. and Mrs. H. Bricker, a daughter.

The June Rod and Gun

While each issue of Canada's foremost outdoor magazine contains some features of special interest, the June number of Rod and Gun in Canada, published by W. J. Taylor, Westerville, Ohio, is notable for several such features, each one of particular interest to all sportsmen. "Three Weeks in the Forests of Quebec," with the successful capture of a moose, will prove enthralling to all big game hunters while the story of the success of Jack Miner in attracting wild geese in large numbers to a pond near his home cannot fail to hold the attention and secure the interest of all wild land lovers. The latter story forms a splendid illustration of the success of protection and should encourage all engaged in the work. Mr. Miner has demonstrated the fact that it is possible to succeed with the way wild geese and success with such birds means that efforts in other directions need not spell failure. The importance of the policy of conservation justifies the illustrated account of the gathering at Toronto University. This policy means more to the future of Canada than the present generation can fully realize and to all interested in the great old days it is vital. A full supply of studies appealing to all tastes is included in a number which will prove a fine companion on all vacation trips.

A Savings Account Helps

Opening a Savings Account in the Union Bank makes it easier to save. You get into the habit of depositing more or less regularly, small amounts of money that would otherwise quickly slip away. At the end of the year, with the interest added, there is a substantial balance to your credit—and you have scarcely missed the deposit. A Savings Account in the Union Bank is a reserve which you ought to provide against possible sickness or financial reverses. Why not start one now?

Withstands a Hot Fire

It is difficult to conceive of a very much more severe fire test that could be imposed upon the walls of a building than that withstood by the concrete parts of a 100,000 bus. grain elevator that was burned at Kentland, In. not long ago. At the time of the fire, everything was very dry and the buildings were so quickly enveloped in flames that the workmen had scarcely time to escape with their lives. An American exchange which reproduces photographs showing how the concrete work stood the test, gives this information.

"In an L. formed by the different buildings, a reinforced concrete grain drier had been erected and enclosed by a frame ironclad covering. This building was 10 ft. from the elevator building on the side and 16 ft. distant on the end, which was connected with the elevator by wood conveyor boxes.

"The plant contained approximately 450,000 ft. of lumber and 50,000 bu. of grain, which was consumed in a few hours, leaving nothing but the concrete drier standing plumb, surrounded by a smouldering mass of debris. The drier housing was burned away; the metal fans and steam pipes were red hot and warped. The brass grease cups on the fan bearings were melted and the iron doors, warped, but the concrete work remained intact with little damage notwithstanding the fact that it contained at out 700 lbs. of corn which was reduced to ashes during the fire. The drier supported its own garner, and 12,000 lbs. of steam pipe, yet not one of its supports failed. In no previous grain elevator fire has the concrete been put to such a severe test, and in no case has it passed through a fire with more gratifying results to owner and builder.—Nor-west Farmer.

National Importance of Public Health

The fundamental importance of the subject of public health to our national civilization and industrial efficiency was concisely expressed by the Chairman of the Commission of Conservatism in his inaugural address before the First Annual Meeting of the Commission. In this connection Mr. Sifton said in part: "The physical strength of the people is the resource from which all others derive value. Extreme an scrupulous regard for the lives and health of the population may be taken as the best criterion of the degree of real civilization and refinement to which a country has attained. It cannot be said that it has received too much attention, though the Provinces, the Dominion, and the municipalities have health laws and health administrations all doing effective and useful work. There are, however, many branches of the subject, general in their character, which merit attention. The Dominion spends hundreds of thousands of dollars in eradicating the diseases of animals, and the work, it is pleasing to know, is being done with thoroughness. But no similar effort is made by Dominion or Province to meet the ravages of diseases among human beings, such, e.g., as tuberculosis."

That there is a great work to be done in checking the inroads of tuberculosis is evidenced by the mortality statistics of the last census. In the census year there were 6,709 deaths from the disease in Canada. Or, in other words, twelve deaths out of every hundred in that year were due to tuberculosis. And yet tuberculosis is classed by modern medical science as a preventable disease.

No "Flying Start" required with this Mower

If your mower isn't a Frost & Wood, very likely you have to back it up several feet and get a "flying start" before the knives will cut. That is because it is made on the External Gear principle.

Now, with the Frost & Wood No. 8 Mower the knives commence cutting the instant the horses begin to move. That is because the No. 8 is designed on the Internal Gear principle.

Frost & Wood No. 8 Mower

We could tell you here the difference between External Gear Mowers and Internal Gear Mowers, but it would require a lot of space, and we can explain the difference more readily if you'll drop in and see us. We also want to show you the Large Bar used in the Stay-light Connection between Cutter Bar and Main Power Frame, as well as the Double brace used to protect the working parts from jars and jolts—and several other features exclusive to the Frost & Wood No. 8 Mower. Call and see us at your earliest convenience.

Hardware Merchants

Fox Coulee

There are so many new towns springing up all over the west, especially along the new lines of railroad that information regarding them is apt to be a little overdrawn but this does not apply to Fox Coulee, situated in Township 30, Range 20, West 4, 60 miles straight east of Didsbury. In conversation with Mr. A. J. Mackenzie of Fox Coulee, a representative of the Pioneer learned that there were already established at this thriving burg two banks, the Traders and Merchants with the Union locating there this week. Mr. Skinner of Stettin is putting in a hardware store. Rigas and White of the same town are putting up a building 40 x 60 feet for a general business store and a harness store and many other new lines of business are to be started at once. The railroad is putting in half a mile of sidings 40 ft. wide which will give room for four tracks. They have also bought a section of land for a townsite. Most of the grading has been completed from Vegreville to the river and when the junction is taken off they will proceed at once to Calgary. Altogether the outlook for Fox Coulee is a bright one stated as it is right in the heart of the best farming districts in Alberta.

There is great activity in the district, teams passing at all times of the day and night. A heavy snow storm and two rain storms have passed over this way lately giving the moisture needed for the crops, which are looking splendid.

A fine bituminous coal is being mined 3 1/2 miles from the town which sells at \$1.50 per ton at the mine and which is equal to or superior to the best Carbon coal. Good water can be secured at from 50 to 100 ft.

A local improvement district is being formed and preparations are being made for the election of Commissioners. The returning officers are Messrs. Daly, Murray, Turner and Horne.

Mr. Reed, the pioneer settler of this district, now owns 600 acres of land half of which is two miles from town. The C. N. R. from Saskatoon, which is now under course of construction, will get into Fox Coulee junction next year, and with water and coal so convenient a divisional point is an assured fact. With all these points in its favor the country across the Red Deer will eventually prove to be one of the best districts in Alberta.

Bones of a big mastodon have been discovered 250 ft. below the surface of the banks of the river.

Westcott.

A meeting of the residents of Westcott took place on Saturday evening last and it was decided that a Sports day should be held on Saturday, July 16th, at the race track and picnic grounds west of the town. A committee was formed to take up the matter and Westcott will surpass itself on that day. Horse races, foot races, baseball and every amusement that will tend to make the day a success will be brought on. Westcott has a splendid half mile natural race track with high banks surrounding nearly the entire distance which makes a fine grand stand. Every body will be made welcome and it is hoped that there will be a large crowd present.

A Fast Game of Football

The football game between Didsbury and Red Deer on Friday night last at Didsbury, was one that caused a run on the whole gamut of feelings from satisfaction to the wildest frenzy of joy on the part of the Didsbury team's supporters. The first half of the game Didsbury was completely demolished, Red Deer scoring four goals, but to the beginning of the last end Didsbury scored and from that time on they were whirlwinds, and succeeded in putting in three goals before the game was finished, which evened up the score considerably, making one score 3-1 in favor of Red Deer.

Nosser, Winkler and Gaudes of the Didsbury team were the star artists with good assistance from the other members of the team.

The line-up was as follows: Goal, Rex, Greks, Kalbfleisch (Capt.), Martin, Half-backs, Hooper, Burkett, Coolesley, Forwards, Topfille, Waickle, Swesmith, Giddies, Kauffman, W. G. Liesemer, referee.

The teams now stand as follows: Didsbury 3 points, Red Deer 3 points, Innisfail 2 points. Didsbury have one more game to play at Innisfail on July 1st. It is hoped that a good many of their supporters will go with them to cheer them on the road to victory.

Several Red Deer citizens came down with their team, amongst whom were Mr. Snel, the donator of the Snell trophy, which Didsbury has an excellent chance of bringing home this year.

Provincial Exhibition

The entries for the Provincial Exhibition at Calgary June 30th to July 7th have closed and are going to keep the management extremely busy in providing the necessary accommodation. Following is a comparison and some of the most important entries with those of last year:

	1910	1909	Percentage increase
Cattle	431	250	68.36
Horses	775	640	25.89
Sheep and swine	288	172	68.71
Agric. products	109	45	375.95

These figures do not include any championship entries.

It will be noticed that the increase is very large in each department. In the acre yield competition there are 41 entries.

The exhibition offices and exhibition grounds are now hives of industry, and everything will be ready for the official opening on Dominion Day, July 1st. A large list of rooms have been procured from residents all over the city to assist the hotels in providing accommodation for exhibition visitors. Everything points to the exhibition being a grand success.

A few days ago a rather bashful young woman went to a store carrying three chickens. She enquired the price of chickens and at the same time put them on the counter. The clerk didn't know the chickens' feet were tied, and asked if they would lay for her. She bit her hankie and said: "No, sir, they are roosters."

NOTICE is hereby given that an order has been made, dated the 8th day of June, A. D. 1910, that all creditors and others having claims against the estate of John Milne, late of Napaolis, in the Province of Alberta, farmer, deceased, who died on or about the 1st of June, A. D. 1906, at Napaolis aforesaid, and to whose estate Letters of Administration were on the 9th day of October, 1908, granted to Catherine Milne by the District Court of the District of Calgary, are hereby required to send in particulars of their respective claims, verified by affidavit or statutory declaration together with a statement of security (if any) held by them respectively to the said Administrator, care of H. S. Patterson, of the Town of Didsbury in the Province of Alberta, Solicitor for the said Administrator, by mailing, post, prepaid, or otherwise delivering the same to the said Solicitor before the 10th day of July, 1910, after which date the said Administrator will proceed to distribute the assets of the said estate among the parties entitled thereto, having regard only to the claims of which the said Administrator shall then have had notice, and the said Administrator shall not be liable for the assets of the said deceased or of any part thereof so distributed to any person of whom claimant shall not then have had notice.
Dated this 9th day of June, A. D. 1910.
H. S. PATTERSON,
Solicitor for Catherine Milne,
the above named Administrator.
